

SUJEITH GOPINATH

Senior Frontend Engineer | TypeScript, React, Angular, Next.js, Node.js & Scalable Architecture

+49 152 3621 1923 | sujithgnth@gmail.com | linkedin.com/in/sujithnath | github.com/sujithgnth | [portfolio](#)

Dresden, Germany | Permanent German work authorisation | Available immediately | No sponsorship required

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 10+ years of experience designing and delivering scalable TypeScript applications across logistics, robotics, food delivery, and AI-powered enterprise platforms. Specialised in frontend architecture, React, Angular, Nx monorepos, state management, performance optimisation, and building maintainable application ecosystems. Experienced in owning technical decisions from architecture design through implementation, testing, deployment, and production improvement while collaborating with product and backend teams.

TECHNICAL SKILLS

Frontend: React, Angular, TypeScript, JavaScript, Next.js, Redux Toolkit, NgRx, RxJS, GraphQL with Apollo Client, Tailwind CSS, Component Architecture, Performance Optimisation

Architecture & Engineering: Frontend Architecture, Component Architecture, Reusable Component Systems, Nx Monorepos, Microfrontends, State Architecture, API Abstraction, Performance Optimisation, Security Fundamentals, Automated Testing Strategy, Production Debugging, CI/CD

Full-stack Development: Node.js, NestJS, Express, REST APIs, GraphQL, Apollo Client, MongoDB, PostgreSQL, Redis, S3, Authentication

Testing & Tooling: Playwright, Cypress, Jest, React Testing Library, Docker, CI/CD, Vite, Webpack

PROFESSIONAL EXPERIENCE

Elevait GmbH

Oct 2023 - Present

Full-Stack JavaScript Developer | Dresden, Germany

Technologies: Angular, TypeScript, NestJS, Node.js, Nx, NgRx, MongoDB, GraphQL, S3-compatible storage, Playwright, Docker

- Owned frontend architecture and development of AI document verification workflows using Angular, TypeScript, and Nx, supporting complex human-review and annotation processes.
- Designed scalable multi-annotator workflows including reviewer assignment, task distribution, validation states, conflict handling, and automated approval mechanisms.
- Established frontend architecture patterns, feature boundaries, and reusable application structures to improve maintainability and development velocity.
- Improved system performance by analysing frontend and backend bottlenecks, optimising API responses, MongoDB queries, indexing strategies, filtering, and pagination.
- Collaborated with backend engineers and product stakeholders to define technical solutions for asynchronous workflows, document processing pipelines, and production reliability.
- Implemented automated E2E coverage for critical document-review workflows using Playwright.

Coboworx GmbH

Aug 2022 - Sep 2023

Senior Frontend Engineer | Dresden, Germany

Technologies: React, Redux Toolkit, TypeScript, Tailwind, Cypress, Storybook

- Owned architecture and end-to-end delivery of a React and TypeScript robot-control platform, including workflow design, state management, component architecture, and user experience.
- Designed and maintained frontend state architecture using Redux Toolkit, separating workflow state, application state, and UI concerns to improve maintainability.
- Investigated frontend performance bottlenecks and optimised application loading behaviour, reducing initial load time from approximately 5.0 seconds to 1.7 seconds.

- Developed configurable wrapper services for role- and configuration-driven shared UI components while coordinating implementation standards with an external frontend team.
- Implemented automated frontend testing with Cypress for critical workflows, improving regression confidence during feature development.
- Defined reusable UI patterns and frontend development standards using Storybook while supporting scalable microfrontend approaches.

LoadShare Network

Apr 2018 - Jul 2022

Senior Frontend Engineer | Bangalore, India

Technologies: *React, Redux, React Hooks, TypeScript, Webpack, Node.js, Next.js*

- Served as the primary frontend engineer for a logistics application, delivering operational features with product, design, backend, and engineering teams.
- Modernised a legacy frontend architecture into a React, Redux and TypeScript application with clearer domain boundaries, reusable components and improved maintainability.
- Introduced API abstraction layers and reusable UI patterns to reduce frontend coupling.
- Built reusable React hooks and shared UI components for data-heavy logistics screens.
- Established typed Redux state, selectors, and domain models for cash-on-delivery workflows.
- Delivered logistics workflows covering audit flows, cash-on-delivery handling, and item tracking.

Swiggy

May 2016 - Mar 2018

Frontend Engineer | Bangalore, India

Technologies: *React, Redux, Webpack, Node.js, Next.js, Redis, GraphQL: Apollo Client, Push API*

- Served as the primary frontend engineer for a React and Redux restaurant-vendor application as daily usage scaled from approximately 3,000 to 25,000 users.
- Built core restaurant-vendor workflows with React, Next.js, and Redux, using SSR and SSG for relevant routes and supporting order management.
- Developed Node.js and Express middleware APIs to integrate frontend workflows with internal microservices, handling API orchestration and data transformation.
- Integrated newly released GraphQL APIs to provide efficient and structured data access.
- Used Redis for caching and temporary state management in Node.js middleware services, reducing repeated calls to internal microservices.
- Introduced worker-based order polling, self-diagnostics, and vendor notification flows.
- Developed PWA capabilities using a Service Worker, Push API, and progressive loading, with selected features served through an Android WebView.

Pipemonk (formerly ZapStitch)

Feb 2015 - Apr 2016

Junior UI Developer | Bangalore, India

Technologies: *AngularJS, JavaScript, Bootstrap, Firebase*

- Built features for cloud data-integration platform using AngularJS, JavaScript, and Bootstrap.
- Implemented responsive interfaces, A/B testing support, and Firebase analytic

PERSONAL PROJECTS

- [Password Manager](#): Security-focused application exploring authentication flows, encryption concepts.
- [Observatory](#): Platform for analysing application architecture, performance, and security insights.

EDUCATION

Aug 2008 - Apr 2012

Mahatma Gandhi University, Bachelor of Engineering in Electronics and Communication | India

LANGUAGES

English: Professional working proficiency (C1) | **German:** A2/B1 (TELC B1 preparation ongoing)
