Dresden, Germany | Permanent German work authorisation | Available immediately | No sponsorship required

PROFESSIONAL SUMMARY

Senior Full-Stack TypeScript Engineer with 10+ years building production applications across React, Angular, Node.js/NestJS and PostgreSQL/MongoDB. I own features end to end, from requirements and architecture through APIs, data, testing and production. Most recently, I owned enterprise workflows used by ~200 annotators, contributed to 12% revenue growth, and cut critical search response times from ~15s to ~2s, helping retain enterprise customers. I work closely with product, design and engineering teams and prefer practical, maintainable solutions.

PROFESSIONAL EXPERIENCE

Elevait GmbH

Oct 2023 - Sep 2026

Senior Full-Stack TypeScript Engineer | Dresden, Germany

Technologies: Angular, TypeScript, Node.js, NestJS, MongoDB, NgRx, Nx, MinIO, Playwright, Cursor

- **Built and owned** the Angular/NestJS/MongoDB annotation workspace, implementing document loading, annotation editing, persistence, and validation, used by ~200 annotators and increasing successful **annotation-task completion from ~30% to ~80%**.
- **Built the multi-annotator workflow** across Angular and NestJS APIs, implementing IoU-based reviewer comparison, configurable thresholds, and automated approval rules; **reached 100% adoption** and contributed to **12% revenue growth**.
- **Owned the Verifier workflow**, implementing configurable customer validation rules, approval criteria, and server-side checks; contributed to the **acquisition of SachsenEnergie**.
- **Modernised a NestJS/MongoDB search API** for 50,000+ documents, cutting response time from ~10–15s to ~2s through query redesign and indexing, **helping retain LBS as Customer**.
- **Designed the Angular/Nx architecture** across verification, annotation, and task management, defining domain boundaries, state ownership, shared components, and data-access layers.
- **Redesigned document delivery** across NestJS and Angular, introducing a MinIO-backed preview API that reduced payloads to KB-scale and **load time from ~16s to ~4s**.
- **Raised engineering quality** across frontend and APIs through architecture discussions, PR reviews, Playwright E2E, CI/CD checks, and small, test-validated Cursor-assisted changes.

Coboworx GmbH

Aug 2022 - Sep 2023

Senior Frontend Engineer | Dresden, Germany

Technologies: React, Redux Toolkit, TypeScript, Node.js, PostgreSQL, Redis, PM2, WebSockets, Tailwind CSS, Cypress, Storybook

- **Led the in-house** migration of the React/TypeScript robot-control platform, moving development from external agencies and establishing **internal architecture and delivery ownership**.
- **Built and owned core robot-control workflows** across React and Node.js APIs, including operator dashboards, configuration, execution, and real-time monitoring within 4 months.
- **Introduced PM2 clustering** for the Node.js robot-control backend, using Redis and WebSockets to resolve customer-site realtime performance issues and restore system responsiveness.
- **Designed PostgreSQL data models** for robot-control workflows, integrating Node.js services with persistence for configuration, execution, and monitoring features.
- **Cut initial application load time** from ~7.0s to ~1.7s by profiling frontend bottlenecks and optimising loading behaviour for robot operators.
- **Mentored engineers through PR and architecture reviews**, while introducing reusable components and Cypress regression coverage that made the platform easier for the team.

LoadShare Network

Apr 2018 - Jul 2022

Senior Frontend Engineer | Bangalore, India

Technologies: *TypeScript, React, Next.js, AngularJS, Redux, Node.js, Webpack, PostgreSQL, Prisma, AWS, Amazon S3*

- **Owned delivery for core logistics workflows** across shipment tracking, audits, and cash-on-delivery, working across frontend, APIs, product, and backend teams.
- **Built Node.js APIs backed by PostgreSQL/Prisma and AWS S3**, supporting shipment data and image evidence across audit and COD workflows.
- **Led the migration from AngularJS to React**, Redux, and TypeScript, modularising the application and making new logistics workflows easier to build and maintain.
- **Built real-time delivery-partner tracking** using GPS/location APIs, RabbitMQ, Node.js, and WebSockets, streaming location events from backend services to the operations dashboard.
- **Improved application performance** through server rendering, code splitting, lazy loading, prefetching, and Webpack optimisation across data-heavy dashboards.

Swiggy

May 2016 - Mar 2018

Frontend Engineer | Bangalore, India

Technologies: *React · Redux · Node.js · Express · Redis · RabbitMQ · GraphQL · Apollo Client · Webpack · Service Workers · Push API*

- **Built Swiggy's restaurant-vendor app from scratch**, owning order management, catalogue, discounts, and push notifications as daily usage grew from **~3,000 to ~25,000 users**.
- **Built Node.js/Express APIs and a BFF layer**, integrating internal microservices through GraphQL/Apollo and Redis.
- **Implemented RabbitMQ-based** order event delivery in the backend pipeline, propagating order updates to the vendor app in near real time.
- **Introduced Web Worker-based order polling, self-diagnostics, and vendor notifications**, detecting browser/order-processing issues and improving **CX by ~30%**.
- **Built and optimised the Vendor PWA** using Service Workers, Push API, IntersectionObserver, code splitting, prefetch, and preload to improve **loading and runtime performance**.

Pipemonk (formerly ZapStitch)

Feb 2015 - Apr 2016

Junior Frontend Engineer | Bangalore, India

Technologies: *AngularJS, JavaScript, Bootstrap, MySQL, Firebase, EJS*

- **Built AngularJS workflows** for Pipemonk's cloud integration product, supporting configurable data sync across business apps with A/B testing and cross-device support.
- **Integrated Firebase and MySQL-backed** data flows with EJS storefront pages, serving location-based content and supporting user data and product experiments.

SKILLS

Frontend: React · Angular · TypeScript · JavaScript · Next.js · Nx · Redux Toolkit · NgRx · RxJS.

Backend & Data: Node.js · NestJS · Express · PostgreSQL · MongoDB · Redis · Prisma · RabbitMQ · GraphQL · AWS · Amazon S3 · WebSockets

Quality & Tooling: Playwright · Cypress · Jest · Storybook · Docker · CI/CD · Vite · Webpack · Cursor

EDUCATION

Aug 2008 - Apr 2012

Mahatma Gandhi University, Bachelor of Engineering in Electronics and Communication | India

LANGUAGES

English: Professional working proficiency (C1) | **German:** A2/B1 (TELC B1 preparation ongoing)
