PROFESSIONAL SUMMARY

Senior Frontend Engineer with 10+ years of experience building production systems across AI document processing, robotics, logistics, and food delivery. Owned enterprise workflows used by ~100 annotators across 5 customers, drove 100% internal adoption of a review platform contributing to 12% revenue growth, and delivered customer-critical performance improvements from ~15s → ~2s. Strong in React, Angular, and TypeScript, with frontend-heavy full-stack experience across Node.js, NestJS, APIs, databases, testing, and production debugging.

Frontend: React · Angular · TypeScript · JavaScript · Next.js · Nx · Redux Toolkit · NgRx · RxJS.

Backend & Data: Node.js · NestJS · Express · REST · GraphQL · MongoDB · Redis · S3/MinIO.

Quality & Tooling: Playwright · Cypress · Jest · Storybook · Docker · CI/CD · Vite · Webpack · Cursor

PROFESSIONAL EXPERIENCE

Elevait GmbH

Oct 2023 - Present

Full-Stack TypeScript Developer | Dresden, Germany

Technologies: Angular, TypeScript, Nx, NgRx, NestJS, Node.js, MongoDB, GraphDB, MinIO, Playwright, Docker, Cursor

- **Architected and owned** human-in-the-loop document verification and annotation workflows used by **~100 annotators across 5 major enterprise customers**, increasing successful review completion from **~30% to ~80%** while standardising validation of AI-generated annotations.
- **Designed and standardized** the multi-annotator review workflow company-wide, achieving **100% adoption across annotation teams** and contributing to **12% revenue growth** through IoU-based reviewer comparison, configurable thresholds, and automated approval logic.
- **Owned and engineered the Verifier feature**, comparing document annotations against customer-defined validation rules and approval criteria and contributing to the **acquisition** of enterprise customer **SachsenEnergie**.
- **Modernised a legacy document-search API** serving **50,000+ documents**, cutting response times from **~10–15 seconds to ~2 seconds** through query optimisation, MongoDB indexing, filtering, and search, helping **retain LBS as a customer** while improving annotator productivity.
- **Designed the modular Angular/Nx architecture** across verification, annotation, OCR, and task-management domains, introducing domain-oriented feature boundaries, dedicated NgRx state ownership, shared component libraries, and centralised API/data-access layers that enabled **multiple teams** to extend the platform consistently.
- **Redesigned large-document** delivery by introducing preview API backed by S3-compatible MinIO, replacing larger payloads with KB-scale compressed previews and reducing verification-page load time **from ~16s to ~4s average, improving** annotator responsiveness.
- **Established frontend engineering standards** for verification and annotation workflows through architecture reviews, code reviews, reusable patterns, and Playwright E2E coverage.

Coboworx GmbH

Aug 2022 - Sep 2023

Senior Frontend Engineer | Dresden, Germany

Technologies: React, Redux Toolkit, TypeScript, Node.js, WebSocket, Redis, PM2, Tailwind CSS, Cypress, Storybook

- **Led the migration and in-house adoption of the React/TypeScript robot-control platform**, transitioning development from external agencies to Coboworx's internal engineering team and establishing internal ownership of the frontend architecture, delivery standards.

- **Built and owned core robot-control** product areas including the operator dashboard, robot configuration and execution workflows, role-based user management, and realtime **monitoring within 4 months**, accelerating production readiness and supporting new customer acquisition.
- **Improved robot-command processing and realtime responsiveness** using Node.js, PM2, Redis, isolated processing, and WebSockets, resolving performance issues at customer deployments and helping **restore customer confidence** in the platform.
- **Reduced measured initial application load time from ~7.0 seconds to ~1.7 seconds** by profiling frontend bottlenecks and optimising loading behaviour, improving responsiveness for operators working with the robot-control interface.
- **Established frontend engineering standards across internal and external contributors**, combining architecture reviews, code reviews, reusable React/Storybook components, and Cypress regression coverage helping multiple engineers extend the platform.

LoadShare Network

Apr 2018 - Jul 2022

Senior Frontend Engineer | Bangalore, India

Technologies: *React, Redux, React Hooks, TypeScript, Webpack, Node.js, Next.js*

- **Served as the primary frontend engineer** for an operational logistics platform spanning shipment tracking, audits, and cash-on-delivery workflows, owning frontend delivery across product, design, backend, and engineering teams.
- **Led the modernisation of a legacy frontend** into a React, Redux, and TypeScript application, introducing clearer domain boundaries, typed state models, and reusable implementation patterns as the platform evolved.
- **Established typed Redux state**, selectors, and domain models for shipment, audit, and cash-on-delivery workflows, creating boundaries between server data and presentation concerns.
- Standardised reusable React hooks and shared UI patterns for filtering, pagination.

Swiggy

May 2016 - Mar 2018

Frontend Engineer | Bangalore, India

Technologies: *React, Redux, Webpack, Node.js, Next.js, Redis, GraphQL: Apollo Client, Push API*

- **Served as primary frontend engineer** for Swiggy's restaurant-vendor platform, owning key workflows as daily usage scaled from approximately **3,000 to 25,000 users**.
- **Developed Node.js/Express middleware integrating internal services, using GraphQL/Apollo for structured data access and Redis for caching and temporary state.**
- Built worker-based order polling, self-diagnostics, and vendor notifications to detect issues.

Pipemonk (formerly ZapStitch)

Feb 2015 - Apr 2016

Junior UI Developer | Bangalore, India

Technologies: *AngularJS, JavaScript, Bootstrap, Firebase*

- Built features for cloud data-integration platform using AngularJS, JavaScript, and Bootstrap.
- Implemented responsive interfaces, A/B testing support, and Firebase analytics

EDUCATION

Aug 2008 - Apr 2012

Mahatma Gandhi University, Bachelor of Engineering in Electronics and Communication | India

LANGUAGES

English: Professional working proficiency (C1) | **German:** A2/B1 (TELC B1 preparation ongoing)
