## PROFESSIONAL SUMMARY

---

Senior Full-Stack TypeScript Engineer with 10+ years of experience building production systems across AI document processing, robotics, logistics, and food delivery, with deep frontend expertise in React, Angular, and TypeScript. Owned enterprise workflows used by ~100 annotators across 5 customers, drove company-wide adoption contributing to 12% revenue growth, and delivered customer-critical performance improvements from ~15s to ~2s. Experienced owning features end to end across frontend architecture, Node.js/NestJS APIs, BFF layers, authentication and authorization, MongoDB/Redis data access, testing, and production debugging.

**Frontend:** React · Angular · TypeScript · JavaScript · Next.js · Nx · Redux Toolkit · NgRx · RxJS.

**Backend & Data:** Node.js · NestJS · Express · GraphQL · MongoDB · PostgreSQL · Redis · S3/MinIO.

**Quality & Tooling:** Playwright · Cypress · Jest · Storybook · Docker · CI/CD · Vite · Webpack · Cursor

## PROFESSIONAL EXPERIENCE

---

### Elevait GmbH

Oct 2023 - Present

Senior Full-Stack TypeScript Engineer | Dresden, Germany

**Technologies:** Angular, TypeScript, Nx, NgRx, NestJS, Node.js, MongoDB, GraphDB, MinIO, Playwright, Docker, Cursor

- **Architected and owned** end-to-end human-in-the-loop document verification and annotation workflows across **Angular, NestJS, and MongoDB**, used by ~100 annotators across 5 major enterprise customers and increasing successful review completion from **~30% to ~80%**.
- **Designed and standardised the multi-annotator** review workflow company-wide, achieving 100% adoption across annotation teams and contributing to 12% revenue growth through IoU-based reviewer comparison, thresholds, backend validation, and automated approval logic.
- **Owned and engineered the Verifier workflow** across frontend and backend boundaries, replacing customer-specific validation logic with configurable rules and approval criteria keeping backend validation as the source of truth, contributing to the **acquisition of SachsenEnergie**.
- **Modernised a legacy NestJS/MongoDB** document-search API serving 50,000+ documents, cutting response times from ~10–15 seconds to ~2 seconds through query redesign, indexing, filtering, and search optimisation, retaining LBS as a customer.
- **Designed modular Angular/Nx architecture** across verification, annotation, and task-management domains, defining domain-oriented feature boundaries, NgRx state ownership, shared components, and centralised data-access layers, enabled teams to extend the platform.
- **Redesigned large-document delivery across NestJS and Angular** by introducing a dedicated preview API backed by S3-compatible MinIO, replacing large full-resolution payloads with KB-scale compressed previews and reducing average load time from **~16s to ~4s**.
- **Established engineering standards across frontend and API workflows** through architecture reviews, code reviews, Playwright E2E regression coverage, and CI/CD automation.

### Coboworx GmbH

Aug 2022 - Sep 2023

Senior Frontend Engineer | Dresden, Germany

**Technologies:** React, Redux Toolkit, TypeScript, Node.js, WebSocket, PostgreSQL, Redis, PM2, Tailwind CSS, Cypress, Storybook

- **Led the migration and in-house adoption of the React/TypeScript robot-control platform**, transitioning development from external agencies to Coboworx's internal engineering team and establishing internal ownership of the application architecture and delivery standards.

- **Built and owned core robot-control** product areas across the React frontend and supporting APIs, including the operator dashboard, robot configuration and execution workflows, and real-time monitoring within 4 months, supporting customer acquisition.
- **Improved robot-command processing across the Node.js backend and React frontend** using PM2, Redis-backed shared state, isolated processing, and WebSockets, resolving realtime performance issues at customer deployments and helping restore customer confidence.
- **Reduced measured initial application load time from ~7.0 seconds to ~1.7 seconds** by profiling frontend bottlenecks and optimising loading behaviour, improving responsiveness for operators working with the robot-control interface.
- **Established engineering standards** across internal and external contributors through architecture and code reviews, reusable components, Cypress regression coverage, and shared implementation conventions that enabled multiple engineers to extend the platform consistently.

## LoadShare Network

Apr 2018 - Jul 2022

**Senior Frontend Engineer** | Bangalore, India

**Technologies:** *React, Redux, React Hooks, TypeScript, Webpack, Node.js, Next.js, AWS, Amazon S3*

- **Served as the primary frontend engineer** for an operational logistics platform spanning shipment tracking, audits, and cash-on-delivery workflows, owning frontend delivery across product, design, backend, and engineering teams.
- **Led the modernisation of a legacy frontend into a React, Redux, and TypeScript application**, introducing clearer domain boundaries, typed state models, reusable implementation patterns, and maintainable API integration as the platform evolved.
- **Designed typed Redux state** and domain models for shipment, audit, and cash-on-delivery workflows, clearly separating server data, workflow state, and presentation concerns.
- Standardised reusable React hooks and shared UI patterns for filtering, pagination.

## Swiggy

May 2016 - Mar 2018

**Frontend Engineer** | Bangalore, India

**Technologies:** *React, Redux, Webpack, Node.js, Next.js, Redis, GraphQL, Apollo Client, Push API*

- **Served as primary frontend engineer** for Swiggy's restaurant-vendor platform, owning key workflows as daily usage scaled from approximately **3,000 to 25,000 users**.
- **Built and maintained a Node.js/Express** backend-for-frontend layer integrating internal services, shaping frontend-specific API contracts through GraphQL/Apollo and Redis.
- **Built worker-based self-diagnostics** passing order-processing failures to restaurant partners.

## Pipemonk (formerly ZapStitch)

Feb 2015 - Apr 2016

**Junior UI Developer** | Bangalore, India

**Technologies:** *AngularJS, JavaScript, Bootstrap, Firebase*

- Built features for cloud data-integration platform using AngularJS, JavaScript, and Bootstrap.
- Implemented responsive interfaces, A/B testing support, and Firebase analytics

## EDUCATION

Aug 2008 - Apr 2012

Mahatma Gandhi University, Bachelor of Engineering in Electronics and Communication | India

## LANGUAGES

**English:** Professional working proficiency (C1) | **German:** A2/B1 (TELC B1 preparation ongoing)
