

SUJEITH GOPINATH

Senior Frontend Engineer | React, Angular, TypeScript

+49 152 3621 1923 | sujithgnth@gmail.com | [linkedin.com/in/sujithnath](https://www.linkedin.com/in/sujithnath) | github.com/sujithgnth

Dresden, Germany | Permanent German work authorization | No sponsorship required

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 10+ years of product engineering experience across AI document processing, robotics, logistics, and food delivery. Hands-on with Angular, React, TypeScript, Node.js/NestJS, frontend architecture, performance optimisation, automated testing, and reusable component systems.

TECHNICAL SKILLS

Frontend: Angular, React, TypeScript, JavaScript, RxJS, NgRx, Redux Toolkit, Tailwind

Backend: Node.js, NestJS, Express, REST APIs, MongoDB, GraphQL, Redis

Architecture: Nx monorepos, reusable component systems, micro frontends, API abstraction, performance optimisation

Testing: Playwright, Cypress, Jest, React Testing Library, integration and E2E testing

Tooling: Docker, Git, Bitbucket, CI/CD, Storybook, Vite, Webpack

PROFESSIONAL EXPERIENCE

Elevait GmbH

Oct 2023 - Present

Full-Stack JavaScript Developer | Dresden, Germany

Technologies: Angular, TypeScript, NestJS, Node.js, Nx, NgRx, MongoDB, GraphQL, S3-compatible storage, Playwright, Docker

- Build frontend-heavy full-stack workflows for AI document processing, verification, annotation, and human review using Angular, TypeScript, and NestJS.
- Reduced image payloads and improved review-page loading by storing compressed document previews in S3-compatible object storage instead of loading full-resolution images.
- Implemented Angular annotation workflows for loading document images, creating review annotations, managing review states, and synchronising data with backend APIs.
- Delivered task-management workflows across Angular and NestJS, including the user interface, API integration, and workflow-state handling.
- Improved slow document listing and search operations by optimising NestJS query handling, MongoDB indexing, filtering, and pagination.
- Provided technical direction for Angular document review workflows through architecture decisions, code reviews, reusable implementation patterns, and coordination with backend engineers.
- Added Playwright regression tests for critical document-review and annotation workflows.

Coboworx GmbH

Aug 2022 - Sep 2023

Senior Frontend Engineer | Dresden, Germany

Technologies: React, Redux Toolkit, TypeScript, Tailwind, Cypress, Storybook

- Owned the robot-control frontend end to end, enabling users to create and run custom robot motions through a Blockly-based workflow.
- Reduced measured application load time from approximately 5.0 seconds to 1.7 seconds through frontend performance optimisation.
- Built reusable React components in Storybook and shared them across product surfaces using micro-frontend patterns.
- Developed configurable wrapper services that rendered shared UI components according to user roles and product configuration.

- Coordinated with an external frontend team on delivery quality, implementation standards, and product expectations.

LoadShare Network

Apr 2018 - Jul 2022

Senior Frontend Engineer | Bangalore, India

Technologies: *React, Redux, React Hooks, TypeScript, Webpack, Node.js*

- Served as the primary frontend engineer for a logistics application, delivering operational features with product, design, backend, and engineering teams.
- Modernised a legacy frontend into a React, Redux, TypeScript, and Webpack-based single-page application with clearer application and state boundaries.
- Introduced API abstraction layers and reusable UI patterns to reduce frontend coupling and simplify feature delivery.
- Delivered logistics workflows covering audit flows, cash-on-delivery handling, and item tracking.

Swiggy

May 2016 - Mar 2018

Frontend Engineer | Bangalore, India

Technologies: *React, Redux, Webpack, Node.js, Service Worker, Redis, GraphQL, Push API*

- Served as the primary frontend engineer for the restaurant vendor application as daily usage scaled from approximately 3,000 to 25,000 users.
- Built core vendor workflows including order management, menu catalogue, discounts, multi-step signup, and push notifications.
- Developed Node.js and Express middleware APIs integrating the vendor application with internal microservices.
- Integrated GraphQL APIs to provide efficient, structured data access across restaurant vendor workflows.
- Used Redis for caching and temporary state management in Node.js middleware services, reducing repeated calls to internal microservices.
- Introduced worker-based order polling, self-diagnostics, and vendor notification flows to improve operational issue detection.
- Developed PWA capabilities using a Service Worker, Push API, and progressive loading, with selected features served through an Android WebView.

Pipemonk (formerly ZapStitch)

Feb 2015 - Apr 2016

Junior UI Developer | Bangalore, India

Technologies: *AngularJS, JavaScript, Bootstrap, Firebase*

- Built frontend features for a cloud data-integration platform using AngularJS, JavaScript, and Bootstrap.
- Implemented responsive interfaces, A/B testing support, and Firebase analytics.

EDUCATION

Mahatma Gandhi University

Aug 2008 - Apr 2012

Bachelor of Engineering in Electronics and Communication | India
