

SUJEITH GOPINATH

Senior Frontend Engineer | Angular, RxJS, Next.js, TypeScript & Frontend Architecture

+49 152 3621 1923 | sujithgnth@gmail.com | linkedin.com/in/sujithnath | github.com/sujithgnth | [portfolio](#)

Dresden, Germany | Permanent German work authorisation | Available immediately | No sponsorship required

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 10+ years of product engineering experience building and operating customer-facing applications across logistics, robotics, food delivery, and AI-powered document processing. Strong in React, Angular, TypeScript, frontend architecture, reusable component systems, state management, Node.js, performance optimisation, and automated testing. Experienced in owning features from architectural decisions through implementation, deployment, monitoring, and iteration with cross-functional teams.

TECHNICAL SKILLS

Frontend: Angular, TypeScript, , React, JavaScript, Next.js, Redux Toolkit, NgRx, RxJS, GraphQL with Apollo Client, Tailwind CSS, Component Architecture, Performance Optimisation

Frontend Architecture: Nx Monorepos, Microfrontends, Storybook, API Abstraction, State Architecture, Design Patterns

Full-stack Development: Node.js, NestJS, Express, REST APIs, GraphQL, Apollo Client, MongoDB, PostgreSQL, Redis, S3, Authentication

Testing & Tooling: Playwright, Cypress, Jest, React Testing Library, Docker, CI/CD, Vite, Webpack

PROFESSIONAL EXPERIENCE

Elevait GmbH

Oct 2023 - Present

Full-Stack JavaScript Developer | Dresden, Germany

Technologies: Angular, TypeScript, NestJS, Node.js, Nx, NgRx, MongoDB, GraphDB, S3-compatible storage, Playwright, Docker

- Owned development of Angular/TypeScript workflows for AI document verification and human-review processes, collaborating across frontend, backend, and product teams to deliver.
- Contributed to multi-annotator document review workflows across Angular and NestJS, implementing task queues, reviewer assignment, auto-approval thresholds.
- Designed reusable frontend patterns, component structures, and application boundaries to support complex document-review workflows and improve maintainability.
- Reduced image payloads and improved review-page loading by introducing compressed document previews through S3 object storage instead of loading full-resolution assets.
- Investigated slow document listing and search operations, optimising NestJS query handling, MongoDB indexing, filtering, and pagination to improve API responsiveness.
- Worked in a modular Angular/Nx frontend architecture with reusable feature libraries, state management, data-access layers supporting document annotation, and OCR workflows.
- Established automated E2E coverage for critical document-review workflows using Playwright.

Coboworx GmbH

Aug 2022 - Sep 2023

Senior Frontend Engineer | Dresden, Germany

Technologies: React, Redux Toolkit, TypeScript, Tailwind, Cypress, Storybook

- Owned end-to-end delivery of a React and TypeScript robot-control frontend, including Redux Toolkit state management for creating and running custom robot motions.
- Designed and maintained frontend state architecture using Redux Toolkit, separating workflow state, application state, and UI concerns to improve maintainability.
- Investigated frontend performance bottlenecks and optimised application loading behaviour, reducing initial load time from approximately 5.0 seconds to 1.7 seconds.

- Built reusable React components and shared UI patterns with Storybook, improving consistency across product surfaces and supporting microfrontend architecture principles.
- Developed configurable wrapper services for role- and configuration-driven shared UI components while coordinating implementation standards with an external frontend team.
- Implemented automated frontend testing with Cypress for critical workflows, improving regression confidence during feature development.

LoadShare Network

Apr 2018 - Jul 2022

Senior Frontend Engineer | Bangalore, India

Technologies: *React, Redux, React Hooks, TypeScript, Webpack, Node.js, Next.js*

- Served as the primary frontend engineer for a logistics application, delivering operational features with product, design, backend, and engineering teams.
- Modernised a legacy frontend architecture into a React, Redux and TypeScript application with clearer domain boundaries, reusable components and improved maintainability.
- Introduced API abstraction layers and reusable UI patterns to reduce frontend coupling.
- Built reusable React hooks and shared UI components for data-heavy logistics screens.
- Established typed Redux state, selectors, and domain models for cash-on-delivery workflows.
- Delivered logistics workflows covering audit flows, cash-on-delivery handling, and item tracking.

Swiggy

May 2016 - Mar 2018

Frontend Engineer | Bangalore, India

Technologies: *React, Redux, Webpack, Node.js, Next.js, Redis, GraphQL: Apollo Client, Push API*

- Served as the primary frontend engineer for a React and Redux restaurant-vendor application as daily usage scaled from approximately 3,000 to 25,000 users.
- Built core restaurant-vendor workflows with React, Next.js, and Redux, using SSR and SSG for relevant routes and supporting order management.
- Developed Node.js and Express middleware APIs to integrate frontend workflows with internal microservices, handling API orchestration and data transformation.
- Integrated newly released GraphQL APIs to provide efficient and structured data access.
- Used Redis for caching and temporary state management in Node.js middleware services, reducing repeated calls to internal microservices.
- Introduced worker-based order polling, self-diagnostics, and vendor notification flows.
- Developed PWA capabilities using a Service Worker, Push API, and progressive loading, with selected features served through an Android WebView.

Pipemonk (formerly ZapStitch)

Feb 2015 - Apr 2016

Junior UI Developer | Bangalore, India

Technologies: *AngularJS, JavaScript, Bootstrap, Firebase*

- Built features for cloud data-integration platform using AngularJS, JavaScript, and Bootstrap.
- Implemented responsive interfaces, A/B testing support, and Firebase analytic

PERSONAL PROJECTS

- [Password Manager](#): Password management app focused on security and architecture.
- [Observatory](#): Platform for analysing software architecture, performance, and security.

PERSONAL PROJECTS

Aug 2008 - Apr 2012

Bachelor of Engineering in Electronics and Communication | India

LANGUAGES

English: Professional working proficiency (C1) | **German:** A2 (B1 in progress) | **Malayalam:** Native
