

SUJEITH GOPINATH

Senior Frontend Engineer | React, Angular, Next.js, TypeScript & Frontend Architecture

+49 152 3621 1923 | sujithgnth@gmail.com | linkedin.com/in/sujithnath | github.com/sujithgnth

Dresden, Germany | Permanent German work authorisation | Available immediately | No sponsorship required

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 10+ years of product engineering experience across robotics, logistics, food delivery, and AI document processing. Hands-on with React, TypeScript, JavaScript, GraphQL, client-side state management, frontend architecture, performance optimisation, modern browser APIs, automated testing, and reusable component systems. Experienced in owning frontend delivery and working across product, design, and backend teams.

TECHNICAL SKILLS

Frontend: React, Angular, TypeScript, JavaScript, Next.js, Redux, RxJS, NgRx, Tailwind, performance profiling, AI-assisted development with Codex and Cursor

Backend: Node.js, NestJS, Express, REST APIs, MongoDB, GraphQL with Apollo Client, Redis

Architecture: Nx monorepos, reusable component systems, micro frontends, API abstraction, performance optimisation

Testing: Playwright, Cypress, Jest, React Testing Library, integration and E2E testing

Tooling: Docker, Git, Bitbucket, CI/CD, Storybook, Vite, Webpack

PROFESSIONAL EXPERIENCE

Elevait GmbH

Oct 2023 - Present

Full-Stack JavaScript Developer | Dresden, Germany

Technologies: *Angular, TypeScript, NestJS, Node.js, Nx, NgRx, MongoDB, GraphDB, S3-compatible storage, Playwright, Docker*

- Build frontend-heavy Angular, TypeScript, and NestJS workflows for AI document verification, annotation, human review, and task management, covering UI implementation, REST API integration, and workflow-state handling.
- Reduced image payloads and improved review-page loading by storing compressed document previews in S3-compatible object storage instead of loading full-resolution images.
- Improved slow document listing and search operations by optimising NestJS query handling, MongoDB indexing, filtering, and pagination.
- Provided technical direction for Angular document review workflows through architecture decisions, code reviews, reusable implementation patterns, and coordination with backend engineers.
- Added Playwright regression tests for critical document-review and annotation workflows.

Coboworx GmbH

Aug 2022 - Sep 2023

Senior Frontend Engineer | Dresden, Germany

Technologies: *React, Redux Toolkit, TypeScript, Tailwind, Cypress, Storybook*

- Owned end-to-end delivery of a React and TypeScript robot-control frontend, including Redux Toolkit state management and a Blockly-based workflow for creating and running custom robot motions.
- Reduced measured application load time from approximately 5.0 seconds to 1.7 seconds through frontend performance optimisation.
- Built reusable React components in Storybook and shared them across product surfaces using micro-frontend patterns.
- Developed configurable wrapper services for role- and configuration-driven shared UI components, while coordinating implementation standards, product expectations, and delivery quality with an external frontend team.

LoadShare Network

Apr 2018 - Jul 2022

Senior Frontend Engineer | Bangalore, India

Technologies: *React, Redux, React Hooks, TypeScript, Webpack, Node.js, Next.js*

- Served as the primary frontend engineer for a logistics application, delivering operational features with product, design, backend, and engineering teams.
- Modernised a legacy frontend into a React, Redux, TypeScript, and Webpack-based single-page application with clearer application and state boundaries.
- Introduced API abstraction layers and reusable UI patterns to reduce frontend coupling and simplify feature delivery.
- Delivered logistics workflows covering audit flows, cash-on-delivery handling, and item tracking.

Swiggy

May 2016 - Mar 2018

Frontend Engineer | Bangalore, India

Technologies: *React, Redux, Webpack, Node.js, Next.js, Redis, GraphQL with Apollo Client, Push API*

- Served as the primary frontend engineer for a React and Redux restaurant-vendor application as daily usage scaled from approximately 3,000 to 25,000 users.
- Built core restaurant-vendor workflows with React, Next.js, and Redux, using SSR and SSG for relevant routes and supporting order management, menu catalogue, discounts, multi-step signup, and push notifications.
- Developed Node.js and Express middleware APIs integrating the vendor application with internal microservices.
- Integrated GraphQL APIs to provide efficient, structured data access across restaurant vendor workflows.
- Used Redis for caching and temporary state management in Node.js middleware services, reducing repeated calls to internal microservices.
- Introduced worker-based order polling, self-diagnostics, and vendor notification flows to improve operational issue detection.
- Developed PWA capabilities using a Service Worker, Push API, and progressive loading, with selected features served through an Android WebView.

Pipemonk (formerly ZapStitch)

Feb 2015 - Apr 2016

Junior UI Developer | Bangalore, India

Technologies: *AngularJS, JavaScript, Bootstrap, Firebase*

- Built frontend features for a cloud data-integration platform using AngularJS, JavaScript, and Bootstrap.
- Implemented responsive interfaces, A/B testing support, and Firebase analytics.

EDUCATION

Mahatma Gandhi University

Aug 2008 - Apr 2012

Bachelor of Engineering in Electronics and Communication | India
